

Shaping up for Summer

[comfort zone] have re-introduced the Body Strategist line - now named Body Strategist + just in time to help your clients get that fantastic bikini body!

This effective treatment range has been improved by the addition of active ingredients Adiposlim™ and Adipoless™ which stimulate lipolysis creating a slimming action and helps to maintain body shape by preventing the development of new fat cells.

The packaging has also been redesigned to allow for easier usage and storage. The complementing retail range now includes the stimulating body brush and Body Strategist + Cellulite Patches.

Loving the Lava

Hot from the Tropics, the new Lava Shells Message offers all the benefits of a hot stone massage, with the added bonus of being eco friendly.

Lava Shells are 100% genuine recycled Tiger Striped Clam Shells from the South Pacific which heat up internally for up to an hour with a patented combination of all natural minerals and water. Therapists use between one and four shells to deliver a deep, therapeutic massage with continuous heat and client touch.

The Lava Shells are powered by LavaGel and need no external equipment, electricity or batteries. In its dry form,

LavaGel is enclosed in a disposable sachet similar to a tea bag that inserts into the shell for use.

Lanni Oil now for retailing

Lanni Oil, a professional alternative for scars and stretch marks, is now available in 250ml retail size at a new lower cost.

University research has identified Lanni as the closest thing to natural sebum making it suitable for even the most sensitive skins, with naturally occurring Vitamins A, D and E and no artificial additives.

As well as healing red scar marks and reducing marking from spots with continuous use, Lanni Oil can also be used as a cleanser or moisturiser, and pre-wax, post-wax and post electrolysis treatments to heal and soften hair for more efficient removal.
